GT ROADSTER

Take the ride of your life—with the newest racing game from Ramtek.

GT Roadster gives you the feeling of realism you've never experienced in a game before. So realistic, you'll think we should have included a seat belt. Because the road you see is the real thing—film, not TV animation. Add the feel of the wheel and the realistic sounds of accelerating, braking and crashing, and you've got a totally new experience in arcade games.

And there's more. With interchangeable film cartridges from Ramtek, you can change to another game in a matter of minutes, just by switching ROMs, cartridges and graphics.

- *Built-in self-test mode*
